

# Document of conformity

In a verification audit, the organisation  
**GWK Grüner Werkzeugkasten GmbH**

has developed a compliant calculation methodology for product-related greenhouse gas balances (product carbon footprint) for the product

## **1 motion picture**

with the declared unit

## **1 minute screening time**

based on the data as of 24 July 2024, (app\_en.version: 2.1, co2 engine.version 2.0) in accordance with the requirements of the standard:

## **DIN EN ISO 14067**

Issue February 2019

The verification was carried out in accordance with the requirements of ISO 14064-3:2020-05.

The Green Toolkit fulfils all the requirements for the accounting system and determination of greenhouse gas-relevant information for the determination of a complete product carbon footprint in accordance with the cradle-to-gate accounting approach in accordance with the above-mentioned standard. The calculation methodology covers the following life cycle stages:

Raw material extraction, pre-production, upstream transport, production

The emission factors used for the calculation originate from published information or credible sources. The survey methodology was checked for suitability and plausibility.

The determination of the specific product carbon footprints and the correct application of the calculation methodology is the responsibility of the above-mentioned organisation.

The certificate is based on the test report with the number C-24-25099.

Berlin, 24 September 2024

Prof. Dr.-Ing. Jan Uwe Lieback  
Managing Director
